Vermiculite has the curious property of expanding, under extreme heat, to several times its original size, and when heated and expanded becomes a light, fluffy material weighing from 5 to 10 pounds per cubic foot.

In its expanded form, vermiculite is one of the best insulators known, and the mineral taken from the country's largest known deposit near Libby, Month, has been used for that purpose commercially.

The conference of extension agents and administration officials sought to draft a definite plan to enforce compliance to cotton production adjustment contracts so as to protect the tenants and share-croppers.

Secretary Wallace called the agents together after Dr. Calvin B. Hoover, professor of economics at Duke University, asserted many tenants and

A resolution by Parker calling for an investigation by five members of the house was taken-under advisement by the committee.

The Bankhead plan provides for baleage allotments to

each farmer, and a heavy tax on all cotton marketed above the allotment.

Cully Cobb, administration cotton chief, said the voluntary and compulchief, said the voluntary and compulsory programs would work perfectly together, as it was expected the allotments under the compulsory plan be virtually the same as produced under normal conditions on the cultivated lands retained under the voluntary acreage retirement contracts. The government pays rentals from the cotton processing tax on land taken voluntarily out of cultivation.

One of the biggest problems now before the administration, in addition to protection of tenants and share-croppers, is bringing into line with the Bankhead legislation the 10 per cent of farmers who did not co-operate in the voluntary program.

They retired to the president's office where Secretary of Treasury
Henry Morgenthau awaited. A printed statement on silver lay on the president's desk.

The proposed nationalization of silver and the statement of policy were disposed of without much debate. The senate group acceded to the wishes of the president that the metallic reserve be placed at 75 per cent gold and 25 per cent silver instead of 70 and 30 as originally proposed. Heated discussion revolved about the purchase of silver to bring its metallic reserve strength to 25 per

Morgenthau insisted upon the right of the treasury to sell as well as buy silver at any time. Mr. Roosevelt supported him. The majority of the senate bloc, however, stood firm and in the end its members said the chief executive yielded.

As the discussion grew more heated, one of the conferees warned the president that failure of the administration to approve a silver program this session would bring defeat of scores of democratic congressmen up for relection and some in the senate.

The cook sneezed, partly because of pepper and partly out of contempt. "Would this soup cost any more in Europe?"

"Liras, francs and shillings cost more," said the Duch-ess thoughtfully.

"I don't use them, snapped the cook. "I use beef and carrots and leeks."

When your travel agent "cooks up" a European tour for you, the principal "ingredients" he puts into it are steamship passage, hotels, meals and railroad, all of which are drastically lower this year than in former years.

Woman Testifies She Saw Fulcher Point Pistol, Then Ran for Aid.

Trial of Harold Fulcher, charged with the murder of H. C. Elder, on January 30, began Tuesday in Fulton superior court before Judge Virlyn B. Moore, two of the state's major witnesses having been placed on the stand during the afternoon.

Sobbing constantly, and at one time becoming so hysterical that the court called a recess, Mrs. Dorothy Elder, widow of the slain man, related the incidents leading up to the time Elder was shot to death while seated in a chair in his Piedmont avenue apart-

Caroline Miller, they lifted from obscurity one of the finest books of the year.

"Having been submitted for the Harper prize and having failed to win it, it was lost in the wake of the prize winner, getting fine critical notices but only a small reading publicity. "One of the best uses of the Pulitzer prize is to turn the glare of publicity on little-known books. In this instance it does us all a great service. For the story of the Georgia farmers told by Caroline Miller deserves to be known, in justice to the farmers themselves. Recent books about the south have dealt with almost nothing but abnormality and degradation.

"Lamb in His Bosom' does not romanticize these farmers, but it admits that they have human qualities and moments when they feel the beauty of soil and sky."

John Chamberlain in the New York Times—"The novel. Tamb in His Bosom, by Caroline Miler, is a competent and freshly written story of the pre-Civil War Georgia backwoods.... "One of the vast progeny of Knut Hamsun's growth of the soil, 'Lamb in His Bosom' has perennially satisfying qualities.... undoubtedly represented the sentiment of the people of Japan and of
the United States—two great peothinks of putting on the brakes.

FACTS Certain non-partisan economic experts have been running around Washington the last few days trying to find out what flaws exist in the business situation. They have discovered these things: Inventories are large in some lines; the 60 per cent steel production is somewhat abnormal, being based on the desire of all steel consumers to stock up before the price increase July 1; a

bill goes into effect.

few orders for automobiles have been canceled.

They have not been able to find any good authority who will say that such discoveries are sufficient justification for the sag of the market. Especially in view of the three proposed amendments to the securities act; the fact that industrial production continues to increase moderately; and the fact that he wages and employment situations are improving, although not nearly as much as expected.

One private Wall Street excuse is that stock prices were further out of line with corporate earnings than they were in 1929. Some figures can be advanced to prove this. That explanation is not convincing because prices are usually based on expectations of earnings in the future.

With the same peculiar reasoning, the boys are now passing around word that President Roosevelt will be forced into inflatio They do not know what kind of inflation, but suspect that it will be based on silver action.

Those nearest the White House say emphatically that Mr. Roosevelt would have to violate every private promise he has made if he goes into silver inflation and that he will not do it. They

have long known that what he is seeking is a silver compromise which will stop far short of any real inflation by that method.

They laugh off the market decline by saying Wall Street always indulges in excesses of despair as well as whoopee. They interpreted the recent decline as a crying jag, a big "boo" for the ad-

ministration and a last fling at market manipulation before the stock

REPUBLICANS The saner republicans here lean toward the idea of making Ralph Williams a stop-gap chairman of the national committee until after the congressiona election.

are wise enough to see that they are now too far in advance of the next presidential election to know what kind of chairman they want. They will probably prevail at the Chicago meeting of the committee next month.

BORAH The republican problem, as viewed from the inside, is to win back the west. They cannot win a presidential election or control of congress without the farm belt. crats have the south and will keep it. The east may go republican, but that will not be enough for republican victory unless the farm states tie themselves again to the G. O. P. elephant's tail.

As one of the big fellows said the other day:

'If Senator Borah were 10 years younger, he would be the man for the chairmanship. As it is, he will have to be consulted and 'The west must be foremost in any reorganization now or

later." NAMES This line of inside talk has brought out only a few

names of western possibilities for the chairmanship. Ex-Governor Kohler, of Wisconsin, is one, Senator Nye another. Neither fits perfectly into the picture. Kohler would be a red flag to the progressive bulls. Nye's political inexperience will be held All in all, the best thing obviously is to wait, and they can wait

TOKENS It was Mr. Roosevelt himself who wrote the language

into the Johnson bill declaring that token payments on war debts hereafter would be taboo.

The fact did not get out at the time that a draft of the Johnson bill was sent to Mr. Roosevelt for his personal inspection. With his own pen he added the language "or any part thereof," describing defaulters as those who default on any part of their debt

NOTES The boys who should know say that Mr. Hoover has no candidate for the chairmanship of the republican national committee.

Clarence Darrow sent Mr. Roosevelt two letters along with his scorching report on NRA policies. One letter demanded the resignation of Mr. Sinclair, who declined to sign the Darrow report, and the other asked the president pointedly whether Darrow should make his scorcher public or whether the president would do it.

James Warburg's new book, "The Money Muddle," has greatly annoyed the new dealers. They consider it implies that the White House did not know what it was doing about the tion. As the first expose (a very mild one) of the London economic conference by one of the president's advisers there, it will probably cause a political rumpus.

#### A Girl Isn't a "Gold-Digger" Just Because She Likes Winners as Well as Men Do

-By Robert Quillen-A young bachelor whose income is considerably above the average, becomes a cynic. He observes that young women make an obvious effort to win his approval, and he learns to think of himself as a good catch. He becomes wary and conceited, and the fear of being married for his money makes him a little ridiculous in the eyes of young women

who have no designs on him. The cynicism of the self-satisfied young male fails to distinguish between warice and common sense. "All a girl wants," says the cynic, "is a meal ticket. She gives herself to the highest bidder, and a poor man hasn't a chance."

The young man exaggerates. Some girls marry rich men they develop marked running at the nose and redness of the eyes and huskiness or hoarseness when they get too much iodin or iodide, a condition we call cultivate the friendship of men more prosperous than themselves? do not love, but the fact that all girls prefer a man who has money is cultivate the friendship of men more prosperous than themselves?

Young women prefer the successful man because, nine times in ten, he is a superior man. A woman's love is based on pity or admiration; if looks up, not down. A normal girl doesn't fall in love with an inferior.

And if money itself influences her choice, is not that an evidence

# Crackers Beat Travelers, 7-2, and Take Lead of League

It was a week before the baseball season began. Mr. Spencer Abbott was sitting in the hotel room talking. I was cupping a hand at the old attentive ear.

"I guess I was born under some sort of a star," said Spencer Abbott. "I always have luck. I go into these towns where baseball has been going badly and I turn out a team which does well. It isn't that I know any more than other guys. I just have luck."

We had been discussing Atlanta as the graveyard of managers. Bert Niehoff, Wilbur Good, Johnny Dobbs, Red Barron, Charley Moore-all of them torpedoed and sunk by the baseball problems of Atlanta.

Abbott laughed it off. He isn't afraid his luck will run out. "I was born under some sort of a star."

Every town he has managed was going badly until he took And he has never failed to make a good showing, usually with a pennant or position No. 2.

It isn't luck, of course. Not all luck. But I will agree with Abbott that there is an element of luck in anything and everything. But he had to have something on the ball.

He is a gambling man, this fellow Abbott. He puts all his dough on one toss of the dice. He went around town, getting up on his hind legs at civic club luncheons, saying:

"I've had all the co-operation possible. I've had all the money I needed to spend. I've been given the players I asked for. If I don't make good, it's my fault. No one else's.'

That's shooting the works on one toss of the dice. He burned all his bridges his first year in a town where baseball had been a flop, despite the expenditure of money and plenty of co-operation for managers who had gone on before him.

His players didn't look so hot to the baseball reporters, some of them, at any rate, but he said: "I like em. They suit me."

An so help me if he hasn't got them in first place this morn-

guess I was born under some sort of a star." There hasn't been an Atlanta jinx since the new

organization took over the Crackers. It was simply a situation which required a fellow with something on

his fast one.

And along came Abbott, who was born under a star.
I expect he was born at 11 a. m. when there are no stars.
He has something on the ball.

THANKS, MR. KEEFE.
It will slay Mr. Bill Keefe to learn that it was New Orleans that put the Crackers out in front. For the first time—at this stage of the game—since 1928.

Elzea Is Winner

On Lakewood Card

Eddie Elzea, the Danish auto racerwestler, defeated John Mauldin, of Atlanta, in two out of three falls in the main event of the opening of the wrestling season at Lakewood park, under the promotion of Weyman Boyles and Matchmaker Oscar Buice. In the semi-final Freddie Lassiter, Ohio state wrestler, beat Wild Bill Collins two out of three falls. This match turned out to be more of a battle than a wrestling match. Referee Tiny Ruff had to take a hand to Collins, due to him using rough factices such as choking and gouging. Tiny cooled him down. Lassiter performed beautifully in defeating Collins. In the opening Gorilla Tucker defeated Bull Schmidt two straight falls. Schmidt lost the second fall on a foul.

# **GRANT FORCED** TO WIN MATCH

**Jack Mooney Beats** Paul Metz.

All matches will have one-fall limits and the headline attraction will feature Tiny Roebuck, the 275-pound Indian buck, opposed to Dick Shikat, former world's champion.

ADDS WEIGHT.

The popular Roebuck has not appeared here in some time. And the fans will be surprised at his new physical appearance. He has put on a lot of solid weight which, with his skill, makes him one of the most formidable matmen in the country today. The match will mean a lot to Roebuck, inasmuch as the winner will be in line for an engagement here with Jim Londos, the chappion.

Roebuck has been a football player of real ability and he uses some of the gridiron tactics on the mat. Shikat is prepared for a tough battle. Since he has been appearing here, the former world's champion has caught the fancy of the fans. Sentiment, therefore, will be divided in the headliner.

VACTUROFF, ROCHE.

This match lasted most of the afternoon and nearly every set was deuced.

LOTT WINS.

George Lott, of Chicago, the defending champion, turned back Harvey Terrell, of Birmingham, 6-0, 7-5, while Lester Stoefen, of Los Angeles, rounded another Birmingham entry, Robert Lake, 6-1, 6-4. In a first-round match earlier in the day, Stoefen eliminated Pollard Parsons, of Nashville, 6-0, 6-0. Berkeley Bell, of New York, reached the quarter-finals by a victory over Billy Hughes, of Memphis, 6-4, 7-5: Robert (Lefty) Bryan, of Chattanoga, defeated Ed Bryan, of Chatt

This match will have a 90-minute limit. And in the semi-windup, one-hour limit, Ivan Vacturoff, the big Russian, is matched with Dorv Roche. Both are fast, cagey and capable of

## Atlanta Club Is One Shy Of Record

As well as they have been going on the current winning streak, the Atlanta Crackers still have one more victory to compile before tying their record of last year.

It will be recalled that the Crackers of 1933, after a slow start, ran their record of wins to eight straight on a road trip which took them to New Orleans, Little Rock and Memphis. The Chicks broke the streak at eight games for them.

phis. The Chicks broke the streak at eight games for them.

The Crackers go to Memphis tomorrow for the last series of their road trip. Harry Taylor, the club's star first baseman, had his hitting streak stopped at 13 games yesterday, but Duck McKee, the outfielder, has hit safely in 11 straight and is batting 375.

PORTLAND CITED.

Last year at Portland, Abbott won 107 ball games and finished only two games and a half below the crack Los Angeles club with a team of free agents. Connie Mack has raided his ball club for players like Higgins. Finney, Coleman, Johnson and others who had helped him win the Coast league pennant in 1932. The Portland owner did not feel that he had the money to buy new players. But he gave Abbott the privilege of signing all the free agents he could get hold of. Abbott did this and finished a snappy second to Los Angeles—a club backed by the Chicago Cubs and Wrigley money.

Victory Gives Atlanta Seven Straight on Road Trip.

LITTLE ROCK, Ark., May 8.— Through the courtesy of the Travelers, who graciously booted in five runs during the pleasant afternoon, the Atlanta Crackers won their seventh straight and second consecutive over the Little Rock club yesterday afternoon at Travelers' field. The score was 7 to 2. Chattanooga lost and Atlanta took the undisputed lead of the

Now Spencer Abbott, Atlanta mau-ager, has been piloting baseball clubs for the last 26 years and far be it from Spencer to teach greed. Mr. Ab-bott would swap the Travelers for the Giants any day. So in the seventh in-ning the Crackers opened their great big hearts and donated a couple to the Travelers—but not five.

Of course Frank Barnes, skyscraper Cracker southpaw, had a fling in the party. His flinging was good enough to hold the Travelers to six hits. Mr. Barnes kept the Little Rockers well in hand with the exception of Leo Nonnenkamp, who rapped out half of them in four times at bar. All were of the one-base species.

WISE GREAT. That Cracker center fielder, Guy Wise, continued his sensational fielding, running in all directions for seven of the 27 putouts. Wise also fumbled a ground ball in the seventh and helped in a large way to keep the Travelers from receiving a coat of whitewark

whitewash. Although guilty of an error earlier atthough guilty of an error earlier in the game, Danny Tapson, who played second before going out for a pinch-hitter, made a great catch in the seventh inning. With two down

one that was labeled for two bases in anybody's ball game. But Daniel climbed about five feet of ether and pulled it down. It was the staffdout fielding feature of the afternoon.

Opening the fourth inning, Duck McKee singled to right, Harry Taylor fouled to Van Grofski but Wise grounded to Trapp, who made a nice stop and tossed to Tapson for the force at second but Danny dropped the ball. Joe Palmisano walked, filling the bases. Moose Clabaugh fouled to Brown but Byrne James singled to right, scoring McKee and Wise with Palmisano taking third. On an attempted double steal, the Atlanta catcher was thrown out at the plate.

MCKEE AGAIN.

McKEE AGAIN. MCKEE AGAIN.

It was McKee again who started with a one-bagger to right in the sixth and was sacrificed by Taylor. Wise forced McKee at third but Trapp, trying for a double play, heaved over Browne's head. After retrieving the ball, Browne tried to catch Wise and third and heaved wildly into the left-field bleachers with Wise scoring. Palmisano flied to Nonnenkamp.

The Crackers presented Little Rock with two runs in the seventh. Etten singled to center and advanced to third on Trapp's single to the same locality when Wise fumbled the ball in fielding it. Brown grounded to Traylor, who, trying for a double, heaved into the outfield with Etten scoring and Trapp stopping at third. Van Grofski popped to James but Buchanan hit to Barnes who was late with his throw to catch Trapp at the plate. Struss, who ran for Buchanan at second, was caught in a chase and Nugent fanned to end the inning.

AND AGAIN.

With one out in the eighth, McKee tripled to center and came in on Taylor's loft to the outfield. Wise flew to Sweetland. The Crackers presented Little Rock

to Sweetland. Atlanta's last three in the ninth came in this fashion: Palmisano drew a pass and scored on Clabaugh's threea pass and scored on Clabaugh's three-bagger to right. Osanto replaced Nugent and walked James, the first man to face him. Attempting a double steal. Clabaugh was safe at home when Van Grofski dropped the peg from second with James rounding to third. Sheerin fanned but, Barnes flied to Sweetland with James scoring after the catch. Chatham popped to Brown for the final out.

Manager Abbott announced last night that Milliard Hayes would do the hurling for the Crackers McCann will depend on Lester Sweetland, southpaw, to break the Crackers' win-ning streak, which has run to seven on the road trip.

While Tech errors helped, it was really the great work of the Oglethorpe infield that saved the day. The Petrels worked two fast double plays, one with the bases loaded, to nip Jacket rallies. Tech's final score came in the sixth when McNenney doubled and scored from second on a play following Push Boyd's infield single. It was heads up base running on the part of McNenney.

Oglethorpe had virtually sewed up the game in the fifth. Sullivan walked, George sacrificed and Vance drove Sullivan home with a ringing single.

Vance supplied the timely hitting for Oglethorpe, batting in a pair of runs with his two blows. Clark and Borman also got two hits. And that was practically the extent of Oglethorpe's bludgeoning. But, with Tech's misplays, it was onlive enough.

The redeeming feature of the afternoon was the performance of Oglethorpe's double play combination in the fourth. These disclosures followed an assertion by Hugh S. Johnson, recovery administrator, at his press conference earlier in the day that code administrator.

Administrator, at his press conference earlier in the day that code administration expenditures were "one of the things I am going to watch around here—I think that right there is the greatest danger of racketeering and oppression there is in this thing."

The recovery chieftain said he expected the steel industry code to be slightly amended and extended when it expired at the end of this month. The amendment, he said, will be based on NRA's own observations of what is wrong with the code and not on the critical reports of the federal trade commission.

Saying the administration group considering revision of the Wagner labor bill had reached an agreement, Johnson restated his position that majority rule in collective bargaining between employes and management was strictly forbidden by the recovery law as now written and could not be adopted, as Wagner desired, without amend of the law.

The plan of assessing members of the oil burner industry to maintain the code authority has not been passed on by Johnson as the order. At the oil burner hearing, Morgan J. HEIRS ARE ESTABLISHED Hammers, chairman of the code authority, former president of the American Oil Burner Association and American Oil Burner Association and Associatio thority, former president of the American Oil Burner Association, and recipient of a considerable portion of the \$65,000, of expenditures, said that former NRA deputy, R. B. Paddock, had told him his (Hammers') own approval of the assessment plan was enough.

The money thus collected, which may be determined to have been without legal sanction, was spent, \$25,600 for salaries; \$8,680 for travel; \$14,295 for legal services.

# Dangers Outweigh New Deal Gains, PEACH GROWERS Felix Morley Tells Athens Institute

Morley said, "the growth of oureau charges, centralization of authority at the expense of state and local governments, and extension of political influence into new forms of state enterprises are dangers of very considerable importance to our traditional system of government.

"Limitation of individual enterprise, whether on farms, in business, or through labor policies, and regimentation of the American people by an unwieldly and largely untrained bureau-cracy, without adequate ciril service provision, threaten in time to bring the new deal to a disastrous termination."

Usually when both players have long and strong both players have long and strong major suits the questions of the final contract is determined solely on the basis of which of the players first tires of attempting to outbid his partner. The fact that a player has, for instance long and des to the five ner. The fact that a player has, for instance, long spades to the five top honors and is void of hearts, bid by his partner, who may have a like holding in that suit, does not promise a happy outcome for the hand. The absence of a suit generally condemns the play of the hand at no-trump, but situations do arise in which no-trump may be the heaf eventual contract, as may be the best eventual contract, as demonstrated by Dr. Bartelmus, of Czecho-Slovakia, in the following un-

So far as the play is concerned, it

will be noticed that there is a plenti-tude of tricks. Both hearts and spades are solid and the two minor aces afford means of ingress to the respec-tive hands. Of course the reader will note that a slam contract, or even a game contract, in either hearts or spades is impossible of fulfillment as spades is impossible of fulfillment as East and West may capture six tricks before the Declarer secures the lead. However happy the result, I am afraid that the bidding was slightly too un-conventional to appeal to my conser-vative mind. I give it merely as an example of what may happen with freak holdings.

At 4:30 o'clock the May festival will take place and the May queen. Miss Grace Ellington. will be crowned.

This event will be followed at 6 o'clock by the annual alumnae banquet in the dining hall, and the day's activities will be climaxed by the annual inter-society debate in the auditorium at 8:30 o'clock. The debate has always been the highlight of commencement activities, fostering the keenest rivalry between the two literary societies. The Lanier society will be represented by Misses Mary Powell and Virginia Brown. The Philologian society will be represented by Misses Mary Powell and Virginia Brown. The Philologian society will be keyed to the highest pitch for this event, but alumnae of all ages will throw off the dignity of age and position and join their younger sisters in supporting the society which has remained dear to their hearts no matter how many years since they were part of the student body of Cox College, which marks the end of its ninety-first year with this commencement.

Alumnae members planning to attend the reunion are requested to advise Mrs. H. L. Stephenson, Walnut 0038, or Miss Julia Mashburn, Hemlock 3571, at the earliest possible date.

Wilbur Wright breaks "World records" on August 8, 1908.

The flights of the Wright brothers at Kitty Hawk, N. C., in 1903 were not "official," but they are regarded today as the first successful flights in a power-driven airplane. During the longest of the flights, Wilbur Wright covered a distance of 852 feet, and the flying time was 59 seconds.

In 1904 and 1905, the Wright brothers made many other tests and flights. For a period they used a large cow pasture not far distant from Dayton, Ohio, for their tests, the pasture being rented to them after pasture being rented to them after they had promised not to disturb the cows! One day during 1904, newspape

reporters were invited to watch a flight; but the attempt ended in dis-mal failure; and a long time passed before anyone else was asked to be present for a trial.

It was not until 1908 that the

world at large came to know much about the success of the Wrights. In that year Wilbur, eldest of the two brothers, went to France to take part in public tests.

deserve high places among meroes of the air." During early years when the airplane was beginning to point the way toward something better than balloons, they were in the front rank; and they were pilots as well as inventors.

By this time several men in Europe had made flights in airplanes of their own design. Santos-Dumont, the man who flew around Eiffel tower in 1901 aboard an airship had turned to heavier-than-air machines; and in 1908 hed made a public flight of 720 1906 had made a public flight of 720 feet in 21 seconds, aboard a biplane which rose by its own power. Bleriot had built a monoplane, and had used it for successful flights, one covering more than a quarter of a mile.

The Wright biplane which was tak-en to France would not rise by its own power, but a launching tower was set up; and by means of pulleys, ropes and a falling weight, it was pushed ahead fast enough to get off the

ground.

Some persons laughed about such a method of launching a plane; but there was a great chorus of praise when Wright showed what his plane could do after rising. On September 20, 1908, he made a flight which lasted an hour and 31 minutes! It was not a cross-country flight, being made in circles; but it was enough to cause people in Europe to hail him as the greatest master of the air.

#### By JOHN L. COOLEY. NEW YORK, May 8.—(P)-Stocks brightened today in the wake of silver developments at Washington, and net gains of 1 to 5 points stood in

contrast to the market's severe shakeout of Monday. No doubt traders used the silver news as an excuse for covering short commitments; it also seemed probable that the market had become oversold, putting it in position for a rally.

Chicago wheat rose about a cent and a half a bushel, but Winnipeg figures were up 3 cents as the "weathfigures were up 3 cents as the "weather market" continued. Cotton gained moderately. As was to have been expected, silver futures blossomed out with a strong rally which boosted them considerably more than a cent an ounce. Bar silver at 43 3-4 did not have a chance to reflect the new turn of affairs, since its price was set before the market heard what was happening. As outlined in Washington dispatches silver would be nationalized at not more than 50 cents an ounce; it has been a year and a half since the quotation for spot metal was at that level.

Metal shares had a generous appreciation, led by United States Smelting which closed with a gain of more than 6 points. American Smelting rose 3, while gold stocks caught the spirit of the occasion, helped partly by

while gold stocks caught the spirit of the occasion, helped partly by Dome's extra.

Trade news affecting individual issues was somewhat meager. General Motors' April sales figures showed a small improvement over March than is usual, but the total was the best for any month since April, 1931. The tock's advance was fractional.

American Telephone turned strong for a chauge. Its April gross from long lines business was up about a million dollars over last year. Farm implement stocks strengthened with wheat. Many of the industrials were up 1 to 2 points or so. Transactions totaled 1,948,110 shares.

April shipments of United States Corporation will be published Thursday and are expected to reflect the expanded operations, that is, a gain over March seems logical. American Metal Market says the production increase is largely due to stocking by consumers: it estimates consumption at around 53 per cent of capacity.

#### INCREASE IS SHOWN IN CRUDE OIL OUTPUT

WASHINGTON, May 8.—(P)—
The interior department on the basis of bureau of mines reports today estimated crude petroleum production in the United States during March at 75.548.000 barrels compared with 65.450.000 barrels in February.

The production represented a daily average of 2.437,000 barrels, 99,000 above the February daily average and 8,000 barrels above March a year ago.

STOCK OPINIONS. FENNER& BEANE—The upturn in prices
is expected to bring outside buying into the
stock market during early dealings Wednes-
day that should be reflected in further
price gains over closing prices of Tuesday.
BEER & CO We look for prices to en-
counter resistance to the advance around
the 98-100 level, and penetration of this
level would lead to a more favorable inter-
pretation of the near future.  DOBBS & CO.—As the silver conferences
are scheduled to continue it may be ad-
visable to reckon with the probability of
Wednesday's market being under somewhat
of a similar spell as Tuesday.
LIVINGSTON & CO From all appear-
ances, a silver bill as outlined by Senator
Thomas Tuesday, though not mandatory has
probably not yet been fully discounted by
commodities, and this strength should help

stocks.
COTTON OPINIONS. FENNER & BEANE—The market acts like it may respond further to silver news.
BEER & CO.—We continue to favor buy- ing cotton on recessions for quick turns, for the time being.
LIVINGSTON & CO.—A buying movement seems to be under way in all markets.
GRAIN OPINIONS.

GRAIN OPINIONS.

FENNER & BEANE—The wheat market owing to the effects of liquidation is still in position to respond to news of a bullish character.

LIVINGSTON & CO.—Should unfavorable reports continue to come in from European rye territory that grain should attract buying, as it would mean a lessening of imports while the crop prospects in this country are poor.

were mildly irregular at the close of trading today despite some substantial late rallies in the secondard groups apparently occasioned by a brisk up-

turn in stocks. The trading volume dwindled to \$12,015,000, par value, against \$13,-634,000 yesterday and the average for 60 domestic corporate loans eased one-

tenth of a point to 86.5.

There was little news that might have directly affected senior securities. The conference of senate silver advocates with the president and the subsequent report that the chief executive had outlined a two-way program for rehabilitation of the metal, attracted much interest in the final district.

United States government loans were steady to firm and not particularly active. tenth of a point to 86.5.

Rails that came back for advances

Rails that came back for advances of fractions to around a point included some liens of Alleghany Corporation. Missori Pacific, Nickel Plate and Union Pacific. Among losers of as much were bonds of Pennsylvania, New York Central, Louisville & Nashville and Santa Fe.

Utilities and industrials up a point or more included soans of American & Foreign Power, American Water Works, International Hydro-Electric, International Telephone, Paramount, Postal Telegraph, Studebaker and Utilities Power & Light.

Berlin obligations rallied 1 to 5 points and German government 51-2s and 7s advanced a point each. Issues of Poland and Argentina improved, but Japanese bonds sagged.

CHICAGO, May 8.—(P)—Kiting upward almost 3 cents a bushel in flurried buying late today, the wheat market responded briskly to reports of prospective nationalization

Washington advices telling of developments in regard to President velopments in regard to President Roosevelt's silver policy were construed as decidedly stimulating as to wheat values. The new soaring of wheat was from carlier low price levels that were associated with indications of moisture relief northwest and west. Subsequent official reports, however, showed rainfalls were insufficient to be of any material as-

however, showed rainfalls were insufficient to be of any material assistance to wheat crops.

Wheat closed strong at nearly the day's maximum figures 1 1-4 to 1 5-8 above yesterday's finish; corn 3-8 off to 1-4 up; oats unchanged to 1-2 higher, and provisions unchanged to a decline of 2 cents.

a decline of 2 cents.

Broad general purchasing which accompanied the late advance of wheat was led by houses with connections east and northwest.

Better weather for corn, especially in Iowa, tended to make corn and oats prices lag as compared with wheat. Plowing and corn planting were shown to be progressing at a rapid trate.

Provisions averaged lower, influenced by downturns of hog values.

CANANEA, Mexico, May S.—(P)—
A huge encircling movement, designed to "bottle up" the kidnapers of June Robles, was started in this area of old Mexico today by soldiers, rurales, vaqueros and custom guards after two Arizona highway patrolmen told of locating a house in which the 6-year old child recently had been held.

Asserting the kidnaped girl apparrently had been held as recently as two days ago in the house, the Arizona officers, George Ash and Tom Newell, expressed the conviction she was in the hands of two men who had fled in terror as the picturesque man hunters began creeping nearer their trail.

At the same time, Undersheriff College of Directors and Southampton on June 9. P. A. S. Franklin, president of the company, said.

He revealed that the federal government has rejected the company's offer to return the ship into the ship ping board's custody, and that under terms of the original agreement the company must operate the vessel for seven voyages during the remainder of 1934.

# "What is the secret of Old Gold's smoothness and throat-ease?"

asks Helen Hayes [A RECENT OLD GOLD CONVERT]

#### Dear Miss Hayes:-

There isn't any mystery about the exceptional smoothness of Old Golds. The whole credit belongs to Mother Nature, Father Time and his ally, Experience.

Old Gold tobacco is picked from the heart of the stalk, where Nature stores her richest tobacco fragrance and flavor. Then it is aged and mellowed at least thirty months. Then it is blended, for delightful mildness and taste appeal, by America's most experienced tobacconists (Est. 1760).

Such tobacco needs no artificial flavoring. And that's the FINAL reason why Old Golds are so easy on the throat; so cool and biteless.

ESTABLISHED 1760

P. S.—The net of it is this, Miss Hayes: No better tobacco grows than is used in Old Gold. And it's pure. That's why Old Golds are easy on the THROAT and NERVES.
